

“Heritage Series” (Paint Grade Doors) Maintenance and Warranty Information

Finishing

Our “Heritage Series” custom wood garage doors are constructed using only the finest materials. Every effort has been made to ensure long life and satisfactory operation. The base door panels have been treated with a proven, high solids, latex based preservative primer. The exterior trim kit is back primed prior to fabrication, and all exposed edges treated with a sealer specific to this material.

It is very important that this product be finish painted upon delivery to prevent moisture infiltration. A minimum of Two (2) coats of high quality exterior Latex based paint should be applied to all surfaces. Where possible the door panels should be painted prior to installation to ensure proper coverage.

Maintenance

Inspect the exterior surface of your garage door at regular intervals to insure that the paint surface is intact and in good condition. If the paint surface shows signs of peeling or fading, lightly sand the panels to form a good bonding surface, and repaint with a high quality exterior latex paint. Cleaning of the exterior should be done with a damp cloth only. It is not recommended that you spray water under pressure directly at the door surface as this may lead to infiltration and damage. Hardware components should be inspected for proper lubrication and wear. We recommend that you have your garage door inspected by a professional garage door technician Once per year. Garage door hardware components are under tension and pose a danger to untrained personal. Consult the original installing dealer for professional service and maintenance.

Warranty

Equal Door Industries warrants all supplied components to be free from defect for a period of one year from the purchase date. Any part or parts deemed to be defective will be repaired or replaced at the discretion of Equal Door Industries. Freight and field labor charges are excluded. Failure to adhere to the paint finishing instructions may void the warranty on the door panels.
